

Action plan submitted by büşra uçar for BAŞAKŞEHİR ANAOKULU TOKİ MİMAR SİNAN ANAOKULU - 20.01.2023 @ 13:42:35

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security

- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.

### Pupil and staff access to technology

- › Ensure that the policy on mobile phones is being applied consistently throughout the school. Take a look at the fact sheet on Using Mobile Phones at School ([www.esafetylabel.eu/group/community/using-mobile-device-in-schools](http://www.esafetylabel.eu/group/community/using-mobile-device-in-schools)).

### Data protection

- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

### Software licensing

- › It is good that you can produce an overview of installed software and their licences in a short time frame with the help of several people. Consider centralising this.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- › Ensure that all staff are aware of the procedure for purchasing new software and that all licenses are appropriate for the number of pupils and staff that will be using them. The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

## IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teachers can benefit from new technologies while still staying inline with school policy.
- › It is good practice that you are training and/or providing guidance in the use of new software that is installed on school computers. This ensures that school members will take advantage of new features, but also that they are aware of security and data protection issues where relevant.

## Policy

### Acceptable Use Policy (AUP)

- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at [www.esafetylabel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup-).
- › It is good practice that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

### Reporting and Incident-Handling

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline ([www.inhope.org](http://www.inhope.org)).

### Staff policy

- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.

- › You have guidelines in your Acceptable Use Policy (AUP) on teachers' classroom usage of mobile phones. Upload your AUP to your school profile as it is a model of good practice that can help other eSafety Label schools.

## Pupil practice/behaviour

- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

## School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school ([www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school](http://www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school)) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

# Practice

## Management of eSafety

- › In your school, teachers are responsible for their own pupils' online activity. There are many network security and user privacy, audit and procedural tool checks and balances that need to take place to ensure the safety of your pupils and the school networks, and these should be laid down in your School Policy. See our fact sheet on School Policy at [www.esafetylabel.eu/group/community/school-policy](http://www.esafetylabel.eu/group/community/school-policy).

To ensure this happens as efficiently and often as necessary, we advise that the Principal of your school appoints one individual staff member to look after eSafety management in the school. This person will be responsible for seeing that all aspects included in your School Policy are discussed and looked at with other teachers as well as with pupils in the classroom.

To ensure that every staff member, pupil and parent is aware of her or his online rights and responsibilities, see the fact sheet on Acceptable Use Policy ([www.esafetylabel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup-)).

## eSafety in the curriculum

- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).

- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at [www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum](http://www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum).
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.
- › It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.
- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum.

## Extra curricular activities Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetylabel.eu/group/community/information-for-parents](http://www.esafetylabel.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

## Staff training

- › It is good practise that you provide information to teachers on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the [Essie Survey of ICT in schools](#).

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.**
